Subject Index to Volume 9

Boron carbide, metallography of, 357

Carbide morphology in molybdenum and vanadium steels, transitions in, 277
Chromic acid as an electrolytic etchant and electrolyte for the extraction of γ' in nickel-base superalloys, 227
Coal properties by micro-technique, study of, 85
Copper and copper alloys, an improved etchant for, 51
Crack growth and tertiary creep in an austenitic stainless steel, the relation between, 525
Cristaux cubiques maclés, interprétation des diagrammes de diffraction electronique of, application au cas du système cubique centré, 209
Cu-Be-Ni-Zr alloy in phosphoric acid by potentiostatic method, microstructure-revealing mechanism of, 71
Cu-Zn-Al alloys, dendritic structures in, 447

Défauts d'empilement décorés dans un superalliage à base nickel, étude par microscopie électronique à très haute tension du processus de croissance des, 145
Dental welding, super-alloys for, 193

Editorial comment, a call for assistance, 275
Eprouvettes de flexion en WC-Co, utilisation de la métallographie quantitative et de la stéréologie à l'etude des matériaux composites. II. application à l'etude de la rupture d', 503

Fatigue crack propagation in peak-aged and overaged Al-Zn-Mg alloy, comparative electron fractographic study of, 299
Fatigue substructures in steel plates after high cycle vibrations, 383
Fe-Ni-C alloys, fractography of, 9
Fiducial grid for high-resolution metallography, 483
Fractography of several metastable Fe-Ni-C alloys, 9

Iron and silicon particles in a high-strength aluminum alloy, observations on the distribution of, 257
Iron-base alloys, chemical polishing and thinning of, 63

Mangan ion valency state on formation of microstructural constituents during sintering of magnesium oxide, the influence of, 293
Materials and their application in the nuclear industry: invited paper, 459
Metallographic etching techniques, improved, for stainless steel and for stainless steel to carbon steel weldments, 91
Metallographic techniques in the electronics industry, 109
Microanalysis of inclusions, improved extraction replica technique for, 245
Microstructure-revealing mechanism of Cu-Be-Ni-Zr alloy in phosphoric acid by potentiostatic method, 71

$(Nb, Fe)O_2$ oxide in a Fe-Nb-N alloy internally oxidized in the range 1000 C–1300 C, identification of, 341
Nickel-base superalloys, chromic acid as an electrolytic etchant and electrolyte for the extraction of γ' in, 227
NIMONIC-115 during service, effect of σ precipitation on γ' agglomeration in, 351

Niobium-, tantalum-, and vanadium-hydrides, techniques for the metallographic examination of, 309

Optical microscopy, chemical polishing of steel for, 455

Paramétre de voisinage, etude du, 415
Particles in grain boundaries, extent of spreading by, 167
Plastically strained regions in metallic systems, decoration of, 535
Proeutectoid ferrite, observations on the morphology and crystallography of, 397

Reaction-bonded silicon nitride, microstructural analysis of, 427
Reticulated silver sheet, the metallurgy of, 367

Sapphire single-crystal surfaces by vibratory techniques, mechanical preparation of, 333
Silicon nitride, the ladder microconstituent of, 361
Solid-solid-nickel-thoria interfacial free energy with temperature, variation of, 33
Stereomicroscopy, tilt calibration for, 157
Surface diffusion measurements in nickel using a modified relaxation technique, 233
Surface pits and intergranular cavities in aluminum by gallium diffusion, formation of, 123

Ternary phase diagram stacking model, 177
Texture parameters and inverse pole figures: a critical analysis, 1
Transmission electron microscopy of reaction-bonded silicon nitride, 321
Transmission electron microscopy, ultramicrotomy of carbon-graphite materials for, 43
Twinning calculation and computer programs for rotations other than 180 °, 81
Two-phase systems by measurement of interphase contact, determination of the interfacial energy ratio in, 183

Ultramicrotomy of carbon-graphite materials for transmission electron microscopy, 43
